

Release Notes
IFPS13.3
(News You Can Use)
May 30, 2003

2.0 Introduction

2.0 Introduction

This section of the IFPS13.3 Release Notes describes any known special problems and provides workarounds, if they exist.

- **SPR5038 / FR1224**
 - **Title:** Starting on HP does not read IFPS_DEF_WS_Host as desired
 - **Description of Problem:** The IFPS_DEF_WS_HOST was set properly in the ifps-jan.env file, but when launching IFPS from an HP workstation, the host choice is not defaulting to the host defined by IFPS_DEF_WS_HOST.
 - **Work Around:** Select the proper host when the "Choose Host" dialog appears.
 - **Reporting Site:** JAN

- **SPR # / FR #** (Not yet written as of 4/14/2003, but should be available soon.)
 - **Title:** (Not yet written as of 4/14/2003, but should be available soon.)
 - **Description of Problem:** After editing a new color table and selecting "Save...", a red warning dialog comes up. The warning dialog states, "Unable to save color spectrum. NetCDF put failed for colorTable."
 - **Work Around:** TBD
 - **Reporting Site:** AJK
